## Dear Hiring Manager,

I am writing to express my interest in the Frontend Developer position. With over 5 years of overall experience, including 3+ years specializing in React.js, Next.js, Redux Toolkit, and TypeScript, I have consistently built scalable, high-performance web applications with a strong focus on user experience and clean architecture.

In my current role at Foxberry Technologies Pvt. Ltd., Pune, I have contributed to the development of multiple production-grade applications. One of my key projects includes a role-based task management system where I implemented complete task lifecycle management, reusable components, and optimized state handling using Redux. I have also worked on an event and course management platform with payment gateway integration, invoice generation, and CRM functionality, ensuring a seamless user journey.

Additionally, I have developed large-scale systems such as an Online Clinic Registration System and a Survey Management System for government operations, where I implemented multi-step workflows, role-based access control, and real-time dashboards. These experiences have strengthened my ability to design structured, maintainable, and user-centric solutions.

I am particularly strong in translating Figma and Adobe XD designs into pixel-perfect, responsive interfaces, and I take pride in writing clean, reusable, and scalable code. My experience working in Agile/Scrum environments has helped me collaborate effectively with cross-functional teams and deliver impactful results.

I am excited about the opportunity to bring my technical skills and problem-solving mindset to your team and contribute to building high-quality products.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience aligns with your needs.

Sincerely,

Krupa Modi

Frontend Developer

 Pune
